

## SKL Quality

- Entirely made of aluminium
- Custom designed to ensure the accurate efficiency of each heat exchanger
- Industrial manufacturing for heavy duty equipment
- Extruded tubes provide a higher structural resistance
- Complies with OEM and motorist's heat exchange requirement and more.
- Our product is light weight and recyclable
- Tube designed for additional reinforcement
- Aluminium heat exchangers are more efficiency than standard copper units
- All SKL products come with a 1 year warranty

## SKL ALUMINIUM RADIATOR

HEAT TRANSFER SPECIALIST SKL is a manufacturer specialized in the development of aluminium heat exchangers for markets such as OEM's to the after-market. Our product line is composed mainly of radiators, oil and charge air coolers for existing and non existing applications (custom built). Our research and development department have a mandate to constantly improve the quality of our products; guaranteeing our customers innovative and effective solutions.

## Options

- Tank conception for individual applications
- Tank assembly and recore service
- Flat (X 325™) or Regular turn-up Header A
- Anticorrosion surface coating is available for exchangers working in different environmental constraints. B
- Dimpled C or Louvered D Fins
- Simple E or Double Header F

# SOLUTION IN A BREEZE

## CHARACTERISTICS OF SKL PRODUCTS

Headers designed according to strict tolerance specifications, allowing precise assembly, which ensures a perfect seal. For each application, fin options are calculated to assure heat transfer requirements are met. Extruded tubes developed to ensure a structural, resistance, allowing enhancement in heat transfer.

To assemble these components, assembly tables have been designed and built by SKL according to our

PREVOST

We supply the leaders of the industry

specifications. Not only are these tables exceptionally precise but they are also a very flexible tool allowing us to build different sizes of units.

SKL heat exchangers are subjected to strict testing through all production stages, ensuring the high quality SKL is known for.

Our technology guarantees a unique level of brazing

CERTIFIED ISO 9001:2000
